## PROFILES

---

- **GitHub:** <https://github.com/Omsurvase24>
- **LinkedIn:** <https://www.linkedin.com/in/om-survase-812747241/>
- **Portfolio Website:** <https://omsurvase.vercel.app/>

## EDUCATION

---

**SPPU**, P.E.S Modern College of Engineering

Pune, Maharashtra

B.E in Information Technology

**2025 batch**

- Relevant Coursework: Web Development ,OOP, git version control, Documentation

**PAHSU**, Sangameshwar College

Solapur, Maharashtra

Higher Secondary Education

**2021**

- Percentage obtained – 93.33

## EXPERIENCE

---

**Ahen, Pune**

Pune, Maharashtra

*Internship*

**Jan-Apr 2024**

- Developed and deployed multiple chatbots leveraging Python and various machine learning models. For the final project, created an innovative driving lesson chatbot using FastAPI and Google Dialogflow, enhancing user interaction and learning efficiency. Gained hands-on experience with databases like SQLite and MySQL, optimizing data management, performance and retrieval processes.

## SKILLS

---

- **Programming Languages:** PHP, JavaScript, Python, C, C++, HTML, CSS, Java
- **Frameworks and Databases:** Django, Flask, FastAPI, React.js, MySQL, SQLite, PostgreSQL
- **Web Servers:** Apache
- **Soft Skills:** Leadership, Problem Solving, Adaptability, Communication, Collaboration, Teamwork

## PROJECTS

---

**Chat App** - <https://github.com/Omsurvase24/php-Chatapp>

- A PHP Chat application that lets you chat with any person that has registered. It has a clean and responsive user interface (front-end) and user customization such as profile picture, search functionality and also updates the last seen of the person.

**Campus Gateway** - <https://github.com/Omsurvase24/php-CampusGateway>

- A campus hiring platform where TPO posts jobs of various companies with details and students register; tailored notifications match student qualifications to job criteria.

**E-Commerce** - <https://github.com/Omsurvase24/php-Ecommerce>

- A Simple E-commerce application having detail pages for each item wherein the users can order, add items to the cart and generate a bill. It also has an admin dashboard where admin can add a new product category, add product or view orders.

**NGO Website** - <https://github.com/Omsurvase24/php-NGO>

- This is an NGO website where users can choose to donate to a certain cause or choose to volunteer. Along with the basic CRUD operations, the information of the deleted users also can be retained.

**College Canteen** - <https://github.com/Omsurvase24/php-CollegeCanteen>

- A PHP web app empowering college students to order food seamlessly from college canteen while offering administrators the ability to manage orders and add new food items, ensuring a streamlined and efficient canteen experience.

## ACHIEVEMENTS AND VOLUNTEER EXPERIENCE

---

**Mpulse Ignite**

Pune, Maharashtra

*Technical Team Leader*

Feb 2024

I was the **technical team lead** for college's biggest technical event in which I created a validation application for the coordinators for testing or verifying participants of different competitions with their information, payment, etc. This would have been very hard to manage manually or by using on paper solutions as there were **300+ students** from different colleges from all over Pune.

**Indian Institute of Technology Mumbai**  
*Workshop*

Mumbai, Maharashtra  
December 2022

- Attended a surreal 3 days **Machine Learning and Data Science** workshop which was conducted by Indian Institute of Technology, Mumbai. Got hands on software experience for the first time as well as basic hardware knowledge.

**MARS Club**

*Design team member*

Pune, Maharashtra  
July 2022- Aug 2024

- I was the member of the design team for the college club MARS that was based around innovation and entrepreneurship. Throughout the year I made several designs, may it be website or social media posts. I also got experience of how to work in a collaborative way and a team as a whole and was up front for many if not all the events organized.

**Open Source Contributions**

---

- Fixed an error message in the login page, which I found while I was coding and debugging, of an AI and LLM based application that is designed to let user ask queries regarding any hair problems and generates reports on it.
- Working on the back-end for creating a pricing page of a scalable news aggregator application that generates daily news.
